

Shenzhen, China, 4 September 2019 - Cambridge Industries Group (CIG) today announced a full suite of products for 5G wireless fronthaul, midhaul and backhaul applications; and a live demonstration of one of the products: 25G SFP28 ER 40km.

The next generation 5G wireless networks require transmission speed from 10G to 25G; distance to cover 300m, 10km, 20km and 40km; operation temperature to industrial temperature; and BiDi or CWDM products for the markets where fiber is scarce.

The suite of products that CIG provides including:

- 25G SFP28 I-temp 300m, LR/10km, 20km, ER/40km
- 25G SFP28 BiDi I-temp 10km, 20km, 40km
- 25G SFP28 CWDM I-temp 10km

“CIG is dedicated to meet the needs of 5G wireless markets with our full suite of 5G products. With our packaging technologies for the uncooled directly modulated lasers (DML), we strive to quickly bring low cost, low power and high reliable optical transceiver modules to the markets to serve our 5G wireless customers.” said Rose Hu, SVP, marketing of CIG.

CIOE 2019 attendees are invited to visit CIG’s booth #1C51 to view the live demonstration of 25G SFP24 ER 40km module and learn more about the product.

About CIG

CIG Shanghai Co., Ltd (CIG) is a holding company with subsidiaries in China, USA, Japan, Malaysia and Germany. CIG was listed in Shanghai Stock Exchange in 2017.

CIG has 4 business units: Broadband Business Unit, Wireless Business Unit, Photonics Business Unit and Network Business Unit.

As its core competence, CIG has a “two-engine drive” business model, which provides high quality R&D and state-of-the-art manufacturing collaborative services to the ICT industry. There are 850 R&D engineers and over 2000 manufacturing workers in CIG. CIG also collaborates with CMs located in Thailand, Malaysia and Japan to manufacture certain products. Millions of CIG products have been shipped and deployed worldwide each year. Learn more about CIG and connect with us on Twitter: @CIGUSA2.
